KNOW THE ATTACK BEFORE YOU FACE IT.

WEEKLY EDITION

Cyber-Geopolitical Aspects Report

Global edition

03 Oct 2026 – 10 Oct 2026

136	37	21	38
INCIDENTS REPORTED	CRITICAL	COUNTRIES IMPACTED	THREAT ACTORS NAMED

The full spectrum: cyber conflict, AI warfare, geopolitical context and CVE pressure.

Generated 10 Oct 2026 04:04 UTC · rusecure.in

ABOUT THIS REPORT

01 Who we are

Rusecure publishes the **Cyber-Geopolitical Aspects Report**: a recurring, evidence-based picture of cyber conflict and the geopolitics around it, produced with the Cyber Geo-Ops platform.

WHAT WE DO

We monitor 215 security sources — vendors, national CERTs, research groups and the security press — alongside exploited-vulnerability catalogues, ransomware leak-site telemetry, a 25-year record of state-linked incidents, and news-tension indicators. Rules, not a language model, classify each report by incident type, sector, country, threat actor, technique and stated impact, and correlate it with MITRE ATT&CK and CISA KEV.

WHAT THIS REPORT COVERS

Worldwide cyber activity for **03 Oct 2026 – 10 Oct 2026**: the whole picture — where attacks landed, which sectors and actors, the vulnerabilities being exploited and the pressure they put on each country, the geopolitical and AI dimensions, and what national bodies and enterprises should do next.

HOW OFTEN, AND WHERE

Daily, weekly and monthly editions, plus special editions for a custom period or a single country. Published at rusecure.in and shared on LinkedIn.

HOW TO READ THE NUMBERS

Counts are counts of **reports**: one story carried by many outlets is counted once, and a rise in reporting is not proof of a rise in attacks. The method page at the end says exactly how each figure is made.

THE PERIOD AT A GLANCE

02 Executive summary

136	37	21	38	213
INCIDENTS REPORTED	CRITICAL	COUNTRIES IMPACTED	ACTORS NAMED	RANSOMWARE VICTIMS

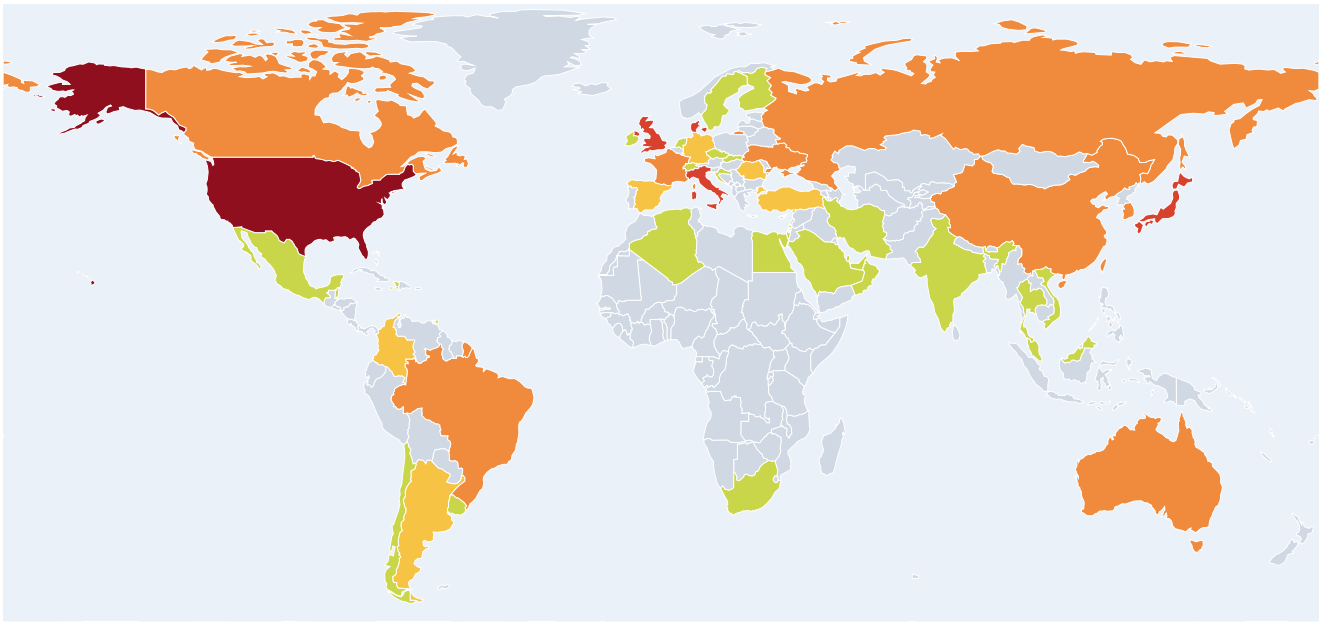

- 136 distinct incidents worldwide were reported by 119 of 215 monitored sources; 37 rated critical.
- Incident reporting is up 37% on the preceding period of equal length (103 -> 141 articles).
- Most affected: USA (15), Denmark (6), Japan (12), UK (8), Italy (4).
- Most targeted sectors: Government (31%), Critical infrastructure (16%), BFSI (16%).
- Dominant activity: breach (67), malware (19), ransomware (18).
- Most reported threat actors: ShinyHunters, Flax Typhoon, HAFNIUM, Qilin.
- 36 vulnerabilities in the news are confirmed exploited (CISA KEV); 6 were added to the catalogue in the period.
- 213 organisations appeared on ransomware leak sites (observed telemetry).
- Rising: Government (+47%), Critical infrastructure (+267%).
- 6 were newly confirmed exploited (added to CISA KEV); a further 0 meet the likely-to-be-exploited filter (EPSS >= 8.8 % and CVSS >= 7).
- CISA SSVC, at medium mission impact: 778 Act, 961 Attend, 58 Track*, 2,079 Track.
- 10 AI-enabled attacks are publicly documented so far; 3 published a loss figure, together US$60.8 million.

Headline incidents

Date	Incident	Where · sector	Impact as stated
10-06	**BREACH** Chinese Government-linked Cyber Threat Actors Combine Automated and Hands-on Hacking Tools to Steal Sensitive Data [1] CISA Alerts	Australia Government, Critical infrastructure	exploited CVE (KEV)
10-05	**BREACH** Denmark population registry data breach affects 8.8 million people [2] BleepingComputer + 1 more	Denmark Government	8,800,000 people
10-05	**ZERO-DAY / EXPLOITED** CVE-2026-88779: Citrix NetScaler Zero-Day Exploited Against SAML Deployments [3] SOCPrime + 1 more	USA Government	Services offline · exploited CVE (KEV)
10-05	**BREACH** IQUALIF France Leak, IUT Paris Seine Breach, US IAB Auction, SMTP Credential Dump, and Apache Struts Exploit Sale [4] SOCRadar	France, USA Manufacturing, Education	10,000,000 records · exploited CVE (KEV)
10-07	**BREACH** Russian cyberattacks against UK are 'Putin Tax' costing $3.3 billion, says lawmaker [5] The Record	Russia, UK	US$3,300,000,000
10-07	**BREACH** Arizona courts say hackers stole info on more than 1.3 million people [6] The Record	—	1,300,000 people
10-08	**RANSOMWARE** Ransomware recovery CEO indicted after allegedly paying hackers and pocketing millions [7] Cyberscoop	USA Government	US$19,000,000 · Data encrypted

WHERE ATTACKS LANDED

03 Global cyber warfare map

no incident reported · low · moderate · high · highest impact

Impact index per country = incident reports in which the country is where the attack landed + 2 × critical ones + sqrt(organisations posted on ransomware leak sites). Countries named only as the origin of an attack are not counted.

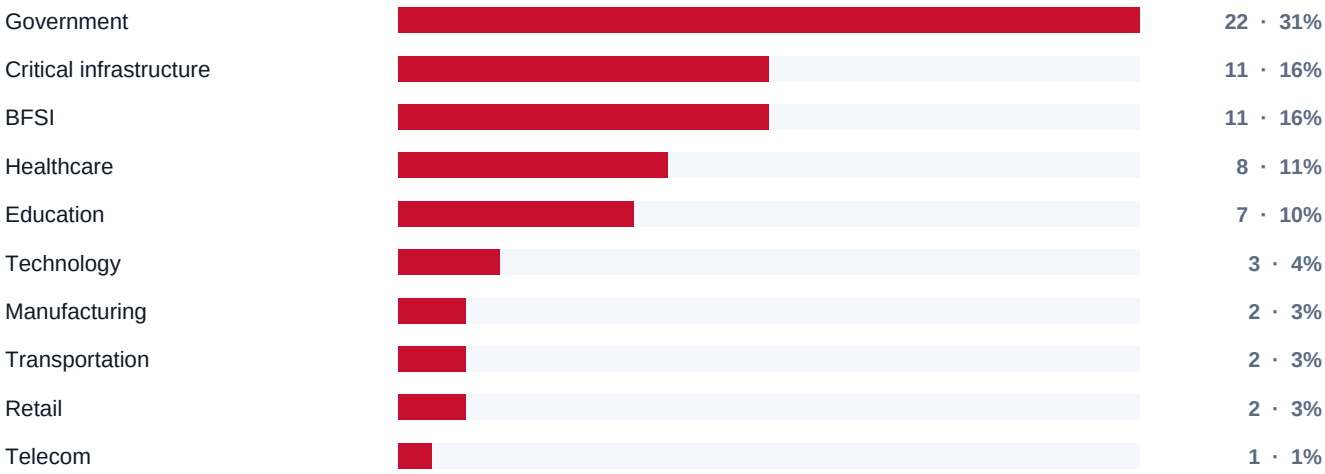

Most impacted countries

#	Country	Incidents	Critical	Leak-site victims	What happened
1	**USA**	15	4	92	15 incident reports, 4 critical; 92 organisations posted on ransomware leak sites; mostly breach and ransomware; hitting Government, Education; named actors: ShinyHunter…
2	**Denmark**	6	5	2	6 incident reports, 5 critical; 2 organisations posted on ransomware leak sites; mostly breach and supply chain; hitting Government, BFSI.
3	**Japan**	12	2	2	12 incident reports, 2 critical; 2 organisations posted on ransomware leak sites; mostly ransomware and breach; hitting Government, Critical infrastructure; named actors…
4	**UK**	8	1	4	8 incident reports, 1 critical; 4 organisations posted on ransomware leak sites; mostly breach and apt / espionage; hitting Government, Critical infrastructure; named ac…
5	**Italy**	4	2	4	4 incident reports, 2 critical; 4 organisations posted on ransomware leak sites; mostly malware and breach; hitting Government, Education; named actors: HAFNIUM.
6	**Australia**	3	2	4	3 incident reports, 2 critical; 4 organisations posted on ransomware leak sites; mostly breach and malware; hitting Government, Critical infrastructure; named actors: FI…
7	**China**	5	2	0	5 incident reports, 2 critical; mostly breach and vulnerability; hitting Critical infrastructure, Healthcare.
8	**S.Korea**	6	1	1	6 incident reports, 1 critical; 1 organisation posted on ransomware leak sites; mostly breach and data leak; hitting BFSI, Telecom.
9	**Russia**	4	2	0	4 incident reports, 2 critical; mostly breach; hitting Government, Healthcare; named actors: Cyber Partisans.

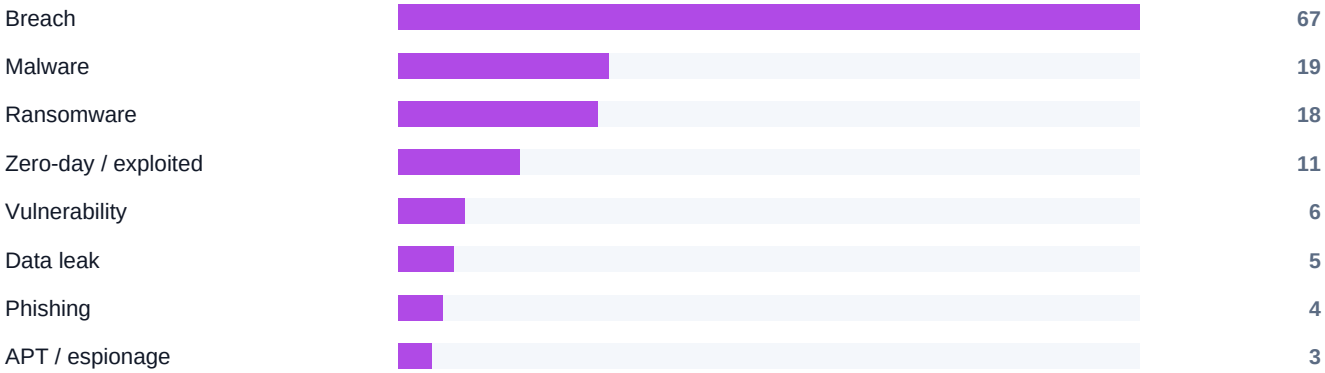

#	Country	Incidents	Critical	Leak-site victims	What happened
10	**France**	3	1	4	3 incident reports, 1 critical; 4 organisations posted on ransomware leak sites; mostly breach; hitting Manufacturing, Education.

WHO WAS TARGETED

04 Sector-wise attack activity

By type of activity

Notable incidents by sector

Government — 22 incident reports (+47% vs the period before)

- Chinese Government-linked Cyber Threat Actors Combine Automated and Hands-on Hacking Tools to Steal Sensitive Data [1] — CISA Alerts, 2026-10-06; exploited CVE (KEV)
- Denmark population registry data breach affects 8.8 million people [2] — BleepingComputer, 2026-10-05; 8,800,000 people
- CVE-2026-88779: Citrix NetScaler Zero-Day Exploited Against SAML Deployments [3] — SOCPrime, 2026-10-05; Services offline · exploited CVE (KEV)

Critical infrastructure — 11 incident reports (+267% vs the period before)

- Chinese Government-linked Cyber Threat Actors Combine Automated and Hands-on Hacking Tools to Steal Sensitive Data [1] — CISA Alerts, 2026-10-06; exploited CVE (KEV)
- US disrupts Chinese hacking tools as 7 govts warn of PRC spies stealing sensitive data worldwide [9] — The Register Security, 2026-10-08
- NetScaler C2: A Massive CVE-2026-88771 Exploitation Operation [10] — SOCRadar, 2026-10-07; exploited CVE (KEV)

BFSI — 11 incident reports (+22% vs the period before)

- Denmark ’s Population Registry Breached, 8.8 Million Affected [11] — Security Affairs, 2026-10-05; 8,800,000 people
- Osaka Metropolitan University Hit by Ransomware, 130,000 Records at Risk [12] — The Cyber Express, 2026-10-07; 130,000 records · Services offline
- UK Cybercrime Journal: Police Cryptocurrency Crime Operations in 2026 [13] — Bushido Token, 2026-10-07; US$4,500,000

Healthcare — 8 incident reports (+14% vs the period before)

- Chinese Government-linked Cyber Threat Actors Combine Automated and Hands-on Hacking Tools to Steal Sensitive Data [1] — CISA Alerts, 2026-10-06; exploited CVE (KEV)
- Denmark ’s Population Registry Breached, 8.8 Million Affected [11] — Security Affairs, 2026-10-05; 8,800,000 people
- Medical devices patients rely on most are least prepared for quantum attacks [14] — HelpNetSecurity, 2026-10-08; 2,500,000 devices

Education — 7 incident reports (+17% vs the period before)

- IQUALIF France Leak, IUT Paris Seine Breach, US IAB Auction, SMTP Credential Dump, and Apache Struts Exploit Sale [4] — SOCRadar, 2026-10-05; 10,000,000 records · exploited CVE (KEV)
- US disrupts Chinese hacking tools as 7 govts warn of PRC spies stealing sensitive data worldwide [9] — The Register Security, 2026-10-08
- Osaka Metropolitan University cancels classes after suspected ransomware attack [15] — The Record, 2026-10-06; Services offline

Technology — 3 incident reports (+50% vs the period before)

- Ransomware attack disrupts Japan's IDCF Cloud used by govt clients [16] — BleepingComputer, 2026-10-08; Services offline
- Atlassian Vulnerability Comes Under Attack Hours After Details Go Public [17] — Security Affairs, 2026-10-08
- ASOS Breach Reveals the Risks in Customer-Facing SaaS [18] — Dark Reading, 2026-10-09

WHO WAS BEHIND IT

05 APT and threat-actor activity

ShinyHunters 16 stories this period · RANSOMWARE

Also known as	UNC6240, Bling Libra
Countries targeted	Netherlands, USA, Russia, Canada, Ukraine
Sectors targeted	Government, Healthcare, Transportation, Defense
Activity reported	Policy & law enforcement, Breach, Research
Typical TTPs (MITRE ATT&CK)	**T1016** System Network Configuration Discovery (discovery); **T1036.005** Match Legitimate Resource Name or Location (stealth); **T1059.007** JavaScript (execution); **T1090.003** Multi-hop Proxy (command and control); **T1110** Brute Force (credential access); **T1190** Exploit Public-Facing Application (initial access); **T1210** Exploitation of Remote Services (lateral movement); **T1213.003** Code Repositories (collection)
Recent reporting	FBI Removes Accenture Contractor After Patch Failure Led to ShinyHunters Breach [25] — The Hacker News FBI Blames Contractor's Missed Patch for ShinyHunters Breach [26] — SecurityWeek

Flax Typhoon 11 stories this period · origin: China · APT

Also known as	Ethereal Panda, Storm-0919
Countries targeted	USA, Taiwan, Australia, Japan, Canada
Sectors targeted	Government, Critical infrastructure, Education, Healthcare
Activity reported	Breach, Malware, APT / espionage
Typical TTPs (MITRE ATT&CK)	no technique profile on record
Recent reporting	Chinese Government-linked Cyber Threat Actors Combine Automated and Hands-on Hacking Tools to Steal Sensitive Data [1] — CISA Alerts US disrupts Chinese hacking tools as 7 govts warn of PRC spies stealing sensitive data worldwide [9] — The Register Security

HAFNIUM 6 stories this period · origin: China · APT

Also known as	Operation Exchange Marauder, Silk Typhoon, ATK233, Red Dev 13, MURKY PANDA
Countries targeted	USA, Italy, Taiwan, UK, Japan
Sectors targeted	Government, Education, Critical infrastructure, Transportation
Activity reported	Breach, Research, APT / espionage
Typical TTPs (MITRE ATT&CK)	**T1003.001** LSASS Memory (credential access); **T1005** Data from Local System (collection); **T1016** System Network Configuration Discovery (discovery); **T1059.001** PowerShell (execution); **T1068** Exploitation for Privilege Escalation (privilege escalation); **T1071.001** Web Protocols (command and control); **T1078.003** Local Accounts (stealth); **T1098** Account Manipulation (persistence)
Recent reporting	US Disrupts China-Linked Integrity Tech 's Cyber Espionage Tools [27] — Security Affairs US Puts $10 Million Bounty on Chinese Hacker Accused of Stealing COVID Research [28] — The Cyber Express

Qilin 5 stories this period · RANSOMWARE

Also known as	—
Countries targeted	Germany, Japan, Russia
Sectors targeted	Government, Manufacturing
Activity reported	Ransomware, Policy & law enforcement, Research
Typical TTPs (MITRE ATT&CK)	no technique profile on record
Recent reporting	Germany arrests alleged core Qilin ransomware member after extradition [29] — BleepingComputer Japan confirms arrest of Russian Qilin operative, extradition to Germany [30] — The Record

Payload 4 stories this period · RANSOMWARE

Also known as	—
Countries targeted	USA
Sectors targeted	Critical infrastructure
Activity reported	Ransomware, Breach
Typical TTPs (MITRE ATT&CK)	no technique profile on record
Recent reporting	86,644 Firewalls in 194 Countries Breached With Stolen Passwords [31] — The Cyber Express FortiBleed still a bleeding nuisance as FBI confirms ongoing attacks [32] — The Register Security

Warlock 4 stories this period · RANSOMWARE

Also known as	—
Countries targeted	Japan, Canada, Denmark, Spain
Sectors targeted	Government, BFSI, Education, Healthcare
Activity reported	Vulnerability, Phishing, Ransomware
Typical TTPs (MITRE ATT&CK)	no technique profile on record
Recent reporting	5th October – Threat Intelligence Report [33] — Check Point Research Making sure the checks get printed [34] — Cisco Talos

WHAT IS BEING EXPLOITED

06 Top CVEs and exploited vulnerabilities

CVE	Affected · description	Severity	Why it matters	Remediation
CVE-2026-88779	**Citrix NetScaler** Citrix NetScaler Improper Restriction of Operations within the Bounds of a Memory Buffer Vulnerability	CVSS 8.7 **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 13 articles this period.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 07 Oct 2026.
CVE-2026-88771	**Citrix NetScaler** Citrix NetScaler Improper Input Validation Vulnerability	score not in feeds **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 9 articles this period.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 30 Sep 2026.
CVE-2026-88772	**Citrix NetScaler** Citrix NetScaler Improper Restriction of Operations within the Bounds of a Memory Buffer Vulnerability	score not in feeds **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 7 articles this period.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 30 Sep 2026.
CVE-2015-3306	**ProFTPD ProFTPD** ProFTPD Improper Access Control Vulnerability	CVSS 10.0 **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 3 articles this period; rated critical by the reporting source.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 11 Oct 2026.
CVE-2026-104286	**Fortinet FortiMail** Fortinet FortiMail Path Traversal Vulnerability	CVSS 9.8 **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 3 articles this period; rated critical by the reporting source.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 04 Oct 2026.
CVE-2015-5477	**ISC BIND** ISC BIND Data Processing Errors Vulnerability	score not in feeds **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 2 articles this period.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 11 Oct 2026.
CVE-2016-3081	**Apache Struts** Apache Struts Command Injection Vulnerability	score not in feeds **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 2 articles this period.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 11 Oct 2026.
CVE-2021-3199	**ONLYOFFICE Docs** ONLYOFFICE Docs Server Path Traversal Vulnerability	score not in feeds **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 2 articles this period.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 11 Oct 2026.
CVE-2021-35394	**Realtek Jungle Software Development Kit (SDK)** Realtek Jungle SDK Remote Code Execution Vulnerability	score not in feeds **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 2 articles this period.	Apply the vendor's update or mitigations now, then check for signs of compromise — it is being exploited. CISA deadline for US federal agencies: 24 Dec 2021.
CVE-2023-22894	**Strapi Strapi** Strapi Cleartext Storage of Sensitive Information Vulnerability	score not in feeds **EXPLOITED**	Confirmed exploited in the wild (CISA KEV); cited in 2 articles this period.	Apply the vendor's mitigations; if none exist, stop using the product. CISA deadline for US federal agencies: 11 Oct 2026.

Severity shows a CVSS score only where a monitored source states one; 'EXPLOITED' means listed in CISA's Known Exploited Vulnerabilities catalogue.

THE BIGGER PICTURE

07 Geopolitical and AI warfare insights

- China -> USA: 10 reports attribute activity against USA to actors linked to China.
- Iran -> USA: 3 reports attribute activity against USA to actors linked to Iran.
- China -> Italy: 2 reports attribute activity against Italy to actors linked to China.
- USA: recorded incident tempo is 1.78× its own long-run rate; the model puts a significant incident within three months at 99%, historically most often originating from Russia.
- Denmark: recorded incident tempo is 2.64× its own long-run rate; the model puts a significant incident within three months at 31%, historically most often originating from China.
- Japan: recorded incident tempo is 1.52× its own long-run rate; the model puts a significant incident within three months at 54%, historically most often originating from China.

State-linked activity in this period's reporting

Attributed origin	Where it landed	Reports
China	USA	10
Iran	USA	3
China	Italy	2
China	Australia	1
Russia	Japan	1
Russia	Canada	1
Russia	Poland	1
Belarus	Russia	1

Outlook for the countries in focus

Country	World risk rank	Tempo vs own norm	P(significant incident, 3 mo)	Expected incidents, 12 mo	Most frequent origin
USA	1	1.78x	99%	95.1	Russia (8%)
Denmark	38	2.64x	31%	3.2	China (13%)
Japan	11	1.52x	54%	7.6	China (20%)
UK	5	1.50x	76%	15.1	Russia (15%)
Italy	7	2.04x	59%	10.6	Russia (16%)
Australia	12	1.76x	53%	7.5	China (13%)

Statistical forecast of publicly recorded incidents from history ending 2024-12-19; this horizon no better than a country's base rate on back-test — read as a base rate. Forecasts describe tendency, not intent.

AI in the conflict

- 14 stories this period involve AI — as the attacker's tool, the target, or the defence.
- National AI capability (AI War Index, an estimate): United States 92.1, China 83.2, United Kingdom 63.7, Israel 61.2, France 61.0.
- Most recent documented AI-enabled attack on record: Agent swarm mass-compromises print servers (2026-08-31).

– Poetry is the new AI security threat as PoeLLM malware infects 3K+ servers [39] — The Register Security, 2026-10-07
– Anthropic Mythos Found A Bug in Rejetto HFS. Attackers Are Now Exploiting It. [40] — Security Affairs, 2026-10-05
– CITRIX 0-DAY EXPLOITS: CVE-2026–88771 & CVE-2026–88772 IN THE WILD [41] — The Raven File, 2026-10-06

WHO HOLDS THE CAPABILITY

08 AI War Index

National capability to use AI in cyber conflict, 0-100, for 2025 (estimated). Weights: offensive 25%, defensive 25%, compute 20%, open source 15%, policy 15%.

#	Country	Index	Offensive	Defensive	Compute	Open source	Policy	1-yr change
1	United States	92.1	92	90	98	95	85	+1.6
2	China	83.2	88	80	80	78	90	+2.1
3	United Kingdom	63.7	62	74	42	60	82	+1.5
4	Israel	61.2	74	78	30	45	70	+0.9
5	France	61.0	52	66	48	66	80	+1.8
6	Republic of Korea	59.2	50	66	55	50	78	+1.9
7	United Arab Emirates	55.6	42	58	55	45	86	+5.1
8	Germany	55.3	40	66	45	58	74	+1.6
9	Japan	53.2	35	62	55	48	72	+1.9
10	Canada	53.1	38	62	40	58	76	+1.2
11	Singapore	51.9	35	66	40	40	84	+2.1
12	Netherlands	51.3	48	66	30	42	70	+1.5

Rising fastest: Saudi Arabia (+5.2), United Arab Emirates (+5.1), India (+3.6), Vietnam (+2.3).

Pillar scores are the platform authors' estimates for 2025, anchored on the public sources named per country. No public index measures national offensive AI capability; treat the scores as a structured judgement, not a measurement. Earlier years are back-cast and later years projected with one documented curve (see app/ai_warfare/index.py).

WHAT HAS ACTUALLY HAPPENED

09 Documented AI-enabled attacks

Date	Incident	How AI was used	Sectors	Reported loss
2026-08-31	Agent swarm mass-compromises print servers AI-orchestrated intrusion	Hundreds of coding agents worked through a target list without human hands	Education, Government, Corporate	not published
2025-11-13	First reported AI-orchestrated espionage campaign AI-orchestrated intrusion · attributed to CN	An agent carried out most of the operation, with people approving key steps	Technology, Finance, Government	not published
2025-08-27	AI coding agent used to run a data-extortion spree AI-assisted intrusion	An agent handled reconnaissance, triage of stolen data and ransom-note drafting	Healthcare, Government, Emergency services	not published
2025-07-17	Malware that asks a language model what to do AI-driven malware · attributed to RU	A hosted open model generated the commands at run time	Government, Defense	not published
2024-07-23	AI-altered identity used to get hired as a remote engineer Synthetic identity · attributed to KP	AI-enhanced photo and stolen identity passed four video interviews	Technology	not published
2024-02-14	State-affiliated groups found using chat models AI-assisted operations · attributed to RU, KP, IR, CN	Research, translation, scripting help and lure writing	Government, Defense, Technology	not published
2024-01-20	Deepfake video-conference fraud against Arup Deepfake video fraud	Every other participant on a video call was synthetic, including the CFO	Corporate, Finance	US$25,600,000
2023-07-13	Criminal chat-model services advertised for fraud AI-generated phishing	Unrestricted language models sold to write convincing business-e-mail-compromise lures	Finance, Corporate	not published

Documented, publicly reported cases only. Loss figures are the ones the cited source reports; 'null' means no figure was published, not that there was no loss. Source links were recorded at curation time — open them before citing.

AI in this period's reporting

- Poetry is the new AI security threat as PoeLLM malware infects 3K+ servers [39] — The Register Security, 2026-10-07

WHAT WAS PUBLISHED, AND WHAT IT AFFECTS

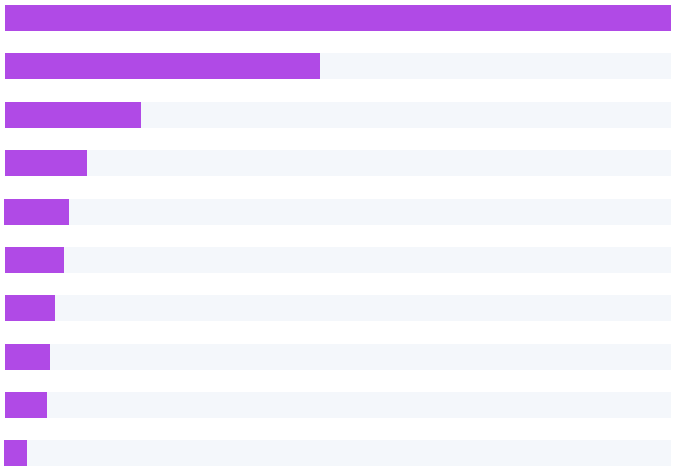

10 Vulnerability landscape

CVEs published in the last 7 days, from the NVD. “KEV” counts those CISA has confirmed as exploited.

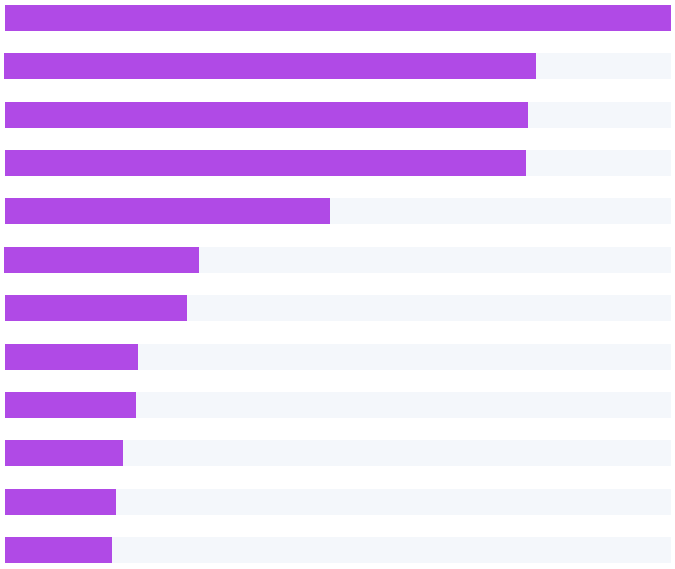

By severity

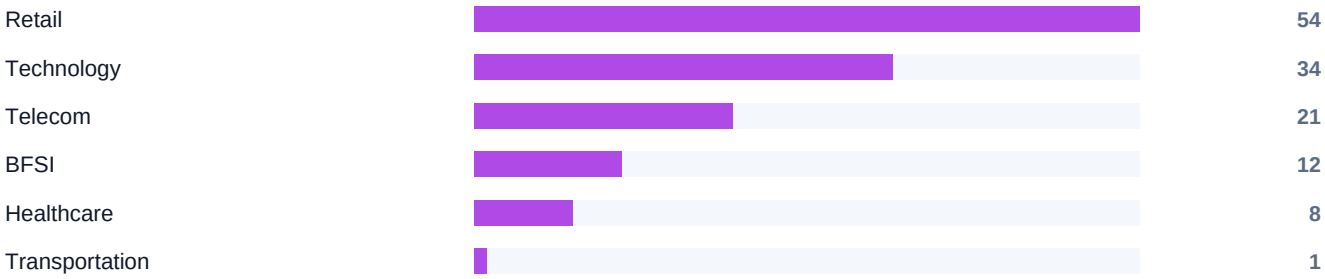

By platform

By application / service

By sector most exposed (inferred from the product)

Platform, application type and sector are assigned by rules over the vendor and product names NVD and the CNA publish, then the description. Sector is an inference from the product; sectors seen in incident reporting are shown separately.

WHAT TO PATCH FIRST

11 Exploitation and priority

778	961	58	2,079
ACT — EMERGENCY	ATTEND — SOONER THAN NORMAL	TRACK* — WATCH CLOSELY	TRACK — NORMAL CYCLE

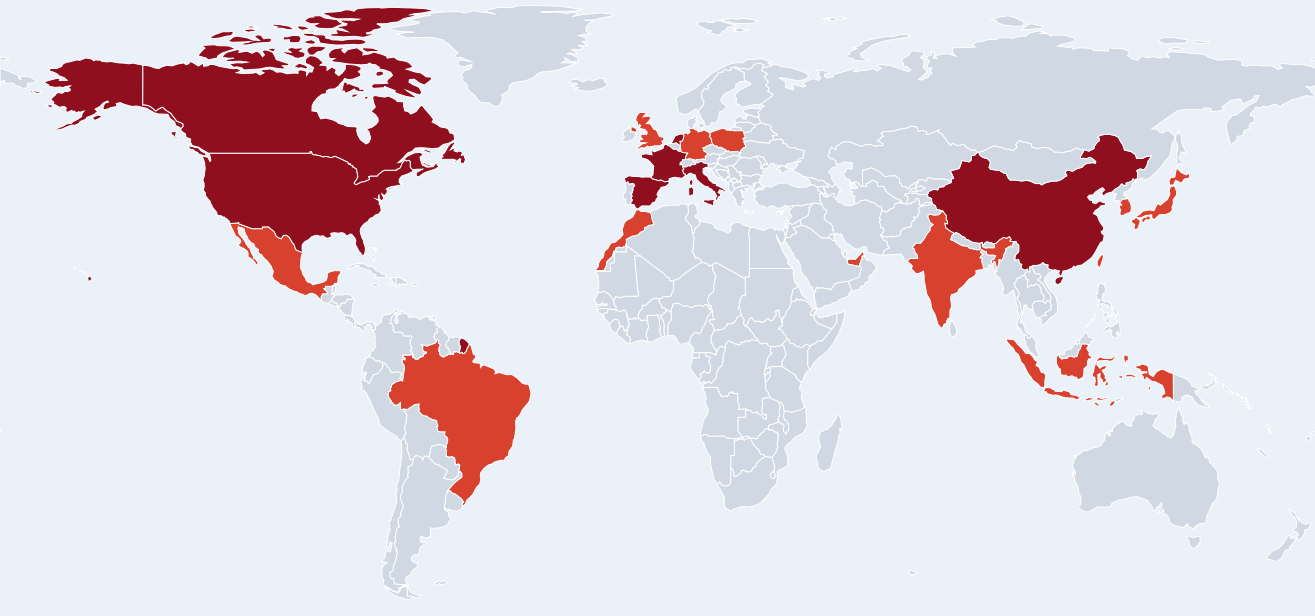

CISA SSVC v2.0.3 decision tree. Exploitation, automatable and technical impact are CISA's own assessment where NVD carries one, otherwise derived from KEV, NVD's 'Exploit' reference tags and the CVSS vector (marked 'derived'). Mission & well-being is yours to set. A CISA KEV entry never ranks below Attend, and is Act while its deadline is open or ransomware use is known.

Act queue — confirmed exploited, deadline open or used by ransomware

CVE	Affects	CVSS	EPSS	Status
CVE-2023-22894	**strapi** Strapi through 4.5.5 allows attackers (with access to the admin panel) to discover sensitive user details by exploiting the query filter. The attacke…	4.9	1.7%	EXPLOITED · due 2026-10-11
CVE-2015-3306	**fedora, debian linux** The mod_copy module in ProFTPD 1.3.5 allows remote attackers to read and write to arbitrary files via the site cpfr and site cpto commands.	10.0	n/a	EXPLOITED · due 2026-10-11
CVE-2021-3199	**document server** Directory traversal with remote code execution can occur in /upload in ONLYOFFICE Document Server before 5.6.3, when JWT is used, via a /.. sequence…	9.8	n/a	EXPLOITED · due 2026-10-11
CVE-2016-3081	**agile controller-campus firmware, anyoffice** Apache Struts 2.3.19 to 2.3.20.2, 2.3.21 to 2.3.24.1, and 2.3.25 to 2.3.28, when Dynamic Method Invocation is enabled, allow remote attackers to exec…	8.1	n/a	EXPLOITED · due 2026-10-11
CVE-2015-5477	**junos, fedora** named in ISC BIND 9.x before 9.9.7-P2 and 9.10.x before 9.10.2-P3 allows remote attackers to cause a denial of service (REQUIRE assertion failure and…	7.5	n/a	EXPLOITED · due 2026-10-11

WHERE THE PRESSURE IS

12 CVE pressure index by country

no incident reported · low · moderate · high · highest impact

#	Country	Index	7-day change	Incident reports citing CVEs	Exploited CVEs	CERT warnings	Exposed hosts
1	USA	87	+4.4	16	18	24	465,414
2	Netherlands	73	+2.8	4	9	9	23,943
3	Canada	61	+8.2	3	2	29	43,904

An index, not a probability. CVE pressure index (0-100) per country: focused incident reports in the last 30 days that place an attack in the country and cite a CVE (round-ups and digests are excluded; exploited CVEs count double), the number of distinct exploited CVEs, warnings about exploited CVEs from the country's own national CERT (a warning is not an attack: low weight, capped), and — only with a Shodan key — internet-facing hosts running affected products. It is an index, not a probability: the series is too young to validate.

WHAT TO DO

13 Conclusion and recommendations

Key takeaways

- 136 distinct incidents worldwide were reported by 119 of 215 monitored sources; 37 rated critical.
- Incident reporting is up 37% on the preceding period of equal length (103 -> 141 articles).
- Most affected: USA (15), Denmark (6), Japan (12), UK (8), Italy (4).
- Most targeted sectors: Government (31%), Critical infrastructure (16%), BFSI (16%).
- Dominant activity: breach (67), malware (19), ransomware (18).

For national-level stakeholders

- Prioritise sector coordination for Government, Critical infrastructure, BFSI: they carry 63% of this period's incident reports.
- Issue or relay advisories for the exploited vulnerabilities listed in this report to operators of essential services, with the catalogue's remediation deadlines.
- Track the state-linked pairings named under Geopolitical Insights; align CERT monitoring and diplomatic channels with them.
- Exercise incident response for ransomware against public services: leak-site telemetry shows it remains the most frequent disruptive event.

For enterprises

- Patch first: CVE-2026-88779, CVE-2026-88771, CVE-2026-88772, CVE-2015-3306, CVE-2026-104286 — all confirmed exploited.
- Watchlist: ShinyHunters, Flax Typhoon, HAFNIUM, Qilin, Payload. Load their techniques into detection engineering.
- Highest-leverage controls against the techniques reported: Privileged Account Management (M1026, addresses 33%); Filter Network Traffic (M1037, addresses 25%); Multi-factor Authentication (M1032, addresses 24%).
- If you operate in Government, brief leadership: it is this period's most targeted sector.
- Hunt for the new indicators of behaviour (registry keys, dropped files, command lines): they outlive IP addresses and domains.

Controls ranked by how much of the reported technique activity they address

Mitigation	ATT&CK id	Addresses	Techniques
Privileged Account Management	M1026	33%	T1190, T1078, T1059.001, T1003.006
Filter Network Traffic	M1037	25%	T1190, T1090, T1105, T1071.004
Multi-factor Authentication	M1032	24%	T1110, T1078, T1133, T1110.001
User Account Management	M1018	22%	T1110, T1078, T1505.003, T1543
Password Policies	M1027	22%	T1110, T1078, T1003.006, T1110.001
User Training	M1017	21%	T1078, T1027, T1566, T1003

How this report is made

- Incident figures count distinct stories in security reporting (one story carried by many outlets counts once), classified by rules. They measure reporting, which tracks — but is not — the number of attacks.
- A country counts as impacted when a report places the attack there; countries named as the origin of an attack are separated by wording cues and by the known origin of the named actor. Both steps are rules and are sometimes wrong.
- Ransomware leak-site figures are observed telemetry. Victim organisations are never stored.
- Forecast figures come from the platform's back-tested model on the public EuRepoC record; the AI War Index is an estimate. Neither is produced by a language model, and nor is any sentence in this report.

WHO STANDS BEHIND THE DATA

15 Resources

The national CERTs, government agencies, standards bodies and open datasets this edition draws on. Each is a public, primary source that a reader can check independently.

BSI

CERT-Bund — Federal Office for Information Security (BSI)
NATIONAL CERT · GERMANY
174 advisories and alerts from its public feed in this period.
bsi.bund.de

CCCS

Canadian Centre for Cyber Security
GOVERNMENT · CANADA
31 advisories and alerts from its public feed in this period.
cyber.gc.ca

INCIBE

INCIBE-CERT — Spanish National Cybersecurity Institute
NATIONAL CERT · SPAIN
22 advisories and alerts from its public feed in this period.
incibe.es/incibe-cert

NCSC-NL

Nationaal Cyber Security Centrum
NATIONAL CERT · NETHERLANDS
14 advisories and alerts from its public feed in this period.
ncsc.nl

HKCERT

Hong Kong Computer Emergency Response Team Coordination Centre
CERT · HONG KONG
13 advisories and alerts from its public feed in this period.
hkcert.org

CISA

Cybersecurity and Infrastructure Security Agency (United States)
GOVERNMENT
11 advisories and alerts from its public feed in this period. Known Exploited Vulnerabilities catalogue: 10 of the vulnerabilities in this edition are listed; remediation deadlines quoted from it.
cisa.gov

CIS

Center for Internet Security (MS-ISAC)
NON-PROFIT
5 advisories and alerts from its public feed in this period.
cisecurity.org

CERT.PL

CERT Polska (NASK)
NATIONAL CERT · POLAND
2 advisories and alerts from its public feed in this period.
cert.pl

NCSC

National Cyber Security Centre (United Kingdom)
GOVERNMENT · UNITED KINGDOM
2 advisories and alerts from its public feed in this period.
ncsc.gov.uk

CERT-EU

CERT-EU — Cybersecurity Service for the EU institutions
CERT · EUROPEAN UNION
1 advisory and alert from its public feed in this period.

Know the Attack Before You Face It.

We watch the public record of cyber conflict — security reporting, exploited vulnerabilities, ransomware telemetry, incident history — and turn it into a view of who is being hit, where, how, and what to do about it. Evidence first: every figure in this report can be traced to its source, and nothing in it was written by a language model.

Published daily, weekly and monthly.

Shared on our website and on LinkedIn — follow us for the next edition.
